

109 Glenwood Boulevard,
Schenectady, N.Y.
Oct. 27, 1922.

My dear Commerford:

I am pleased (by your letter of the 22nd) that my plan, or suggestion of a plan, for Edison commemorative monument at Menlo Park wears well with you. In view of your stating that you have no official standing in the E. Pioneers or Assoc. Edison Ill. Cos. (to push the matter most efficiently), I have made a drawing of my design in good size; ~~and~~ having copies (one for you) blueprinted; and shall send others to Insell and Lieb, with appropriate letters about the matter.

It seems opportune that you mentioned having written an article on the old Edison G. E. Works, Schenectady, when there were some 700 hands employed.

For I am booked to write 4 pages for the next number of the G. E. Review; expected to relate something ~~something~~ about the Edisonian significance of the year 1922, and what has been done (briefly) to honor Edison; especially, of course, in connection with his Oct. 18th visit to the Schenectady Works.

Now, will it be possible for you to loan me your copy of your article aforesaid, and quick (excuse me), but the editor says he must have my 4 pages by Oct. 20th - that is, last week. Editors are always in a hurry - I find.

Perhaps you wrote the article for some electrical journal. If so (in absence of possibility of obtaining your copy to use), you might

Chle.

direct me to the publication, with
possibility of my finding it in
the G. E. library here, which is a
pretty fair one.

With best wishes,

Sincerely yours,

Chas. L. Clarke,

T. C. Martin, Esq.,
